

# Eligibility

Insurance verification made easy.

Infinedi's on-line eligibility service, **Q-Eligibility**, is a real time service tool that provides a web-based view of patient benefits. This service allows providers to quickly and accurately acquire the most current information about enrollee eligibility.

Is your patient insured or eligible for services? Inadequate enrollee verification can create a delay in payment, which harms your practice's cash flow. Discover ways your office can search all participating commercial carriers for patient eligibility within seconds using Q-Eligibility.

Benefits of using Q-Eligibility:

- \* Real-time eligibility
- \* Internet based - requires no new software or other resources
- \* Eliminates phone time spent with insurance companies
- \* Check patient insurance coverage and plan benefits
