

National Provider Identifier Update

The Administrative Simplification provisions of HIPAA mandated the adoption of standard unique identifiers for health care providers and health plans. In accordance, CMS has developed the National Plan & Provider Enumeration System (NPPES) to assign the unique identifiers.

All Health Care Providers who transmit health information electronically in connection with any of the standard transactions are required by law to obtain NPI's, even if they use a business associate, such as a billing service, to prepare the transaction.

In compliance, Infinedi will accept and use the NPI's in standard transactions by the May 23rd, 2007 deadline. For Infinedi to be able to insert and use your NPI numbers, you must submit them to us. You will now be able to submit your NPI'(s) to us through our website via a link on your Q-Services homepage. This link will direct you to a secure NPI submission area.
